

Parallels RAS for Retail

Seamless and secure access to retail applications from any device, anywhere

“Our employees are satisfied because they can choose their own devices, and they could even use enterprise resource planning (ERP) software on their personal devices from home.”

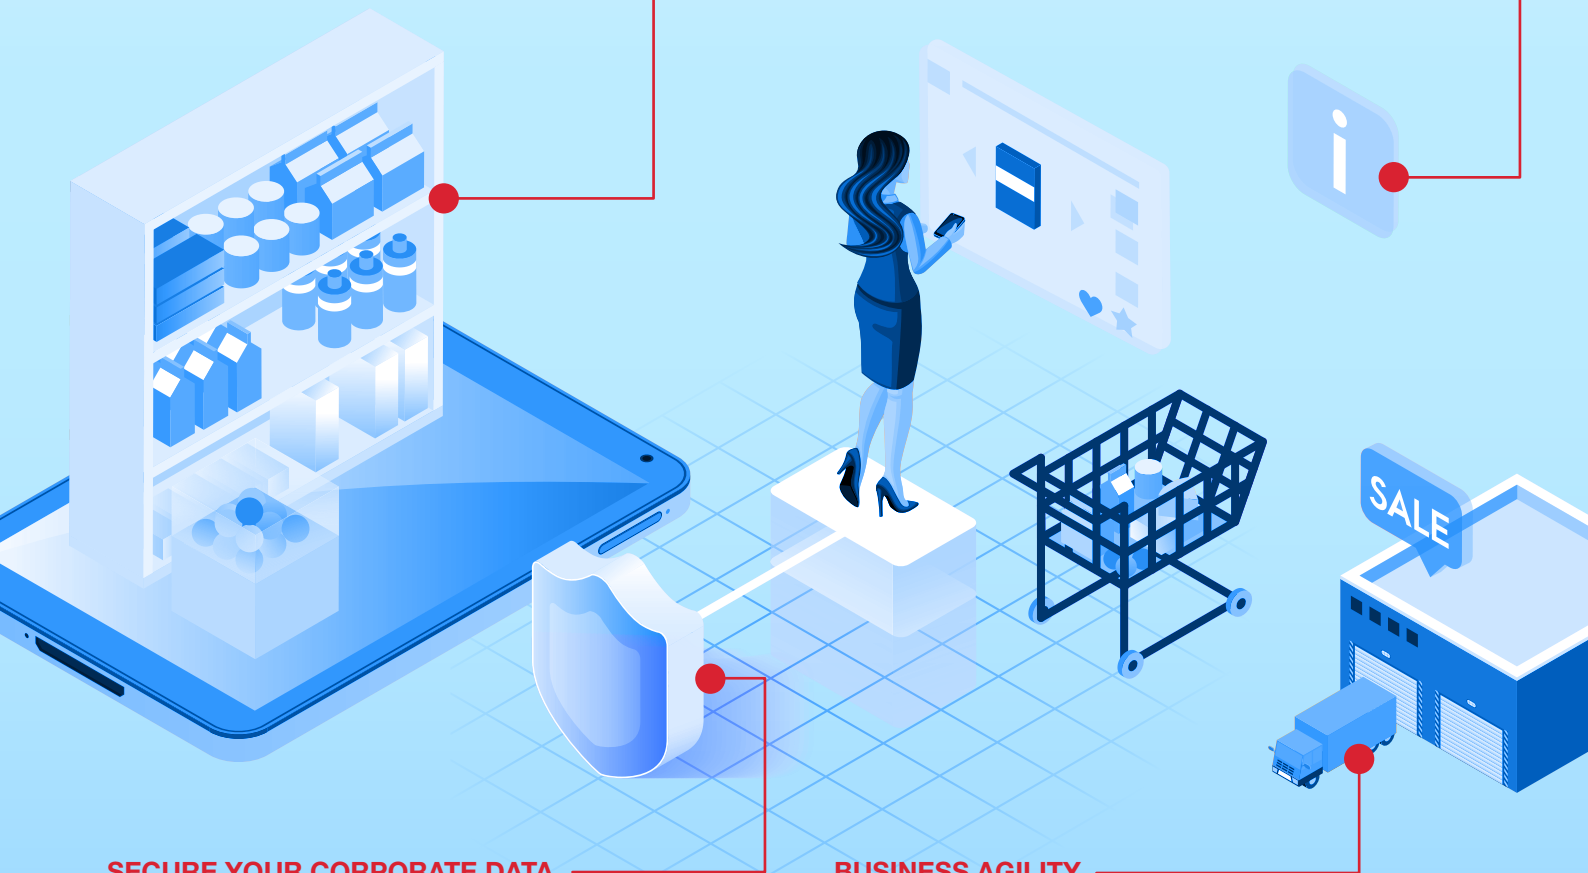

Thorsten Schulze - CEO Automation24

WORKFORCE MOBILITY

Meet business demands and improve productivity by tracking the status of consignments, inventories, and digital documents on-the-go, from any store or warehouse, on any device.

ACCESS APPS ON-DEMAND

Increase employee satisfaction by making Windows desktop applications, including legacy line-of-business (LOB) apps, available on any device, such as PC, Mac, tablet, and mobile. Employees can obtain information directly at their fingertips while providing optimum customer service.

SECURE YOUR CORPORATE DATA

Reinforce data security while adhering to data compliance regulations without compromising end-user productivity. Share crucial data and documents securely across various channels whenever required with multifactor authentication (MFA), encryption, and advanced access filtering.

BUSINESS AGILITY

Simplify warehouse and distribution management and accelerate the speed to market by scaling your IT infrastructure on-demand. Centrally managing multi-cloud deployments from a single console. As Parallels RAS is an out-of-the-box solution, there is no complicated setup and it's straightforward to configure and maintain.
